DesklessOS

Tradespeople spend hours a day driving. DesklessOS lets them do their paperwork on the way, with a phone call.

2–5 h
a day behind the wheel for a trades business owner

€26k
of owner time a year spent driving, at 2 h a day and €60 an hour

200k
skilled tradespeople missing in Germany, so every hour counts

WHAT WE DO

After a customer visit, the owner calls a number from the car and talks. We ask about anything missing, read back a summary and save the job note. Before the next visit, they call again and hear what was agreed. No app, no screen, hands-free over the car's Bluetooth.

Next, the same notes become quotes, crew briefings and timesheets.

PROBLEM

A tile installer near Munich drives 4 to 5 hours a day between 2 and 6 customer visits, takes no notes, and does the paperwork at night. That is normal in the trades:

- A trades vehicle covers 18,000 km a year, about 2 hours of driving per workday.
- The skilled worker drives. Only 4% of trades businesses employ a driver.
- Admin takes 5 to 8 hours a week, mostly in the evening.
- Typing on a phone while driving is illegal. A hands-free call is not.

62% of businesses around Munich already turn work away for lack of staff. An hour saved is an hour they can sell.

WHY NOW

Software can now understand a tradesperson talking German in a noisy car and answer within seconds. Two years ago this was too slow and too expensive for a six-person business.

MARKET

Germany has 1.04M trades businesses, 6.2M workers and €783B in revenue. Over 80% of these businesses drive to customers.

- **Start:** 230k finishing-trades businesses (tile, electrical, plumbing, painting).
- **Germany:** 830k owners at €49 a month is €490M a year. Seats for field staff add about €300M.
- **Then the US:** $1.5T a year is spent on trades services.

COMPETITION

Owners rely on memory, paper and WhatsApp voice messages to themselves. Trades software like Craftnote, Plancraft and HERO needs a screen, so the work waits until evening. We feed those tools instead of replacing them.

BUSINESS MODEL

€49 per owner per month. It pays for itself if it saves 50 minutes a month. Moving 3 hours of admin a week into the car is worth about €8,300 a year. We sell through trade guilds, chambers of trades and building-supply wholesalers.

TRACTION

Working phone prototype. One design partner, who has offered more use cases. Next: 20 owner interviews, 10 weekly users, first paid pilots.

TEAM
